Subject: RPAC Upland EPA Orientation
Date: 10/24/2006 11:42 AM

Kristine,

Rhone-Polenc (aka RPAC, Starlink or SLLI) is scoping an interim groundwater source control measure pilot for their VOC/Silvex groundwater plume. This is one piece of the overall source control strategy that is in development for the site. The RPAC site is complex and is one of the significant potential harbor sources.

RPAC would like to provide you and other members of the EPA team that would ultimately be involved in reviewing RPAC source control decision an overview of their IRM proposal. Proposed dates for this presentation are Nov. 15th and 16th. Alternative dates, if you and your team are not available are Nov. 29th and 30th.

Please let me know if you are available, and who from EPA and/or Parametrix will be attending.
